Emerging and continuing trends expected to impact store shelves include maximizing pleasure – in the forms of simple ingredients to global flavors to upscaling the everyday – and minimizing stress, whether than means seeking convenience, helping to address environmental worries, or finding ways to boost health and mood.¹

2023 INTO 2024 CONSUMER DEMAND INSIGHTS

- Premiumization during inflation has outpaced average spend growth compared to pre-pandemic. Meaning shoppers have adopted new and sticky behaviors with trading up being one of them. A widespread, overarching shopper rationale for buying premium brands is a desire for quality.²

- Today many consumers are on the lookout for more convenient options yet still crave the taste of tea.⁴

IS THERE A SYSTEM TO HOW YOU ASSIGN ITEM NUMBERS?

Yes. The first number of the item number tells how the item is packaged. (1=Full-Leaf Tin or Iced Tea, 3=Bulk Tea, 4=Tea Bag Tin, 6=Traveler's Tin or Overwrap Tea Bags, 8=Full-Leaf Taster Tin)

WHAT IS YOUR MANUFACTURER'S NUMBER?

742676

WHY DO The REPUBLIC of TEA'S TEA BAGS LOOK DIFFERENT FROM OTHER TEA BAGS I HAVE SEEN?

We make our natural, unbleached, gluten-free tea bags without strings, tags or staples because it reflects our overall commitment to the environment. We package the bags in airtight tins with tamper-evident seals so they remain fresh without using difficult-to-recycle materials.

WHERE DOES YOUR TEA COME FROM?

Our fine teas originate from many premium tea and herb gardens around the world, including gardens in Japan, South Africa, China, India, Sri Lanka, Taiwan and Kenya. We select only the finest-quality leaves and proudly offer many teas to delight the palates of our esteemed Citizens.

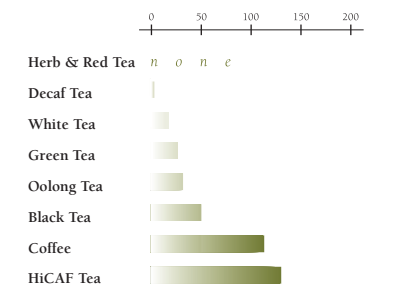

HOW DO YOU DECAFFEINATE YOUR TEAS?

We use an environmentally friendly, chemical-free, high-pressure extraction method using naturally occurring carbon dioxide (CO₂), one of the most modern decaffeination processes. Because CO₂ is a natural component of the air, it is physiologically harmless and leaves no residue. Caffeine is selectively eliminated from the tea, conserving more beneficial components (antioxidants), flavor and color. This costly CO₂ method is the only one used at The REPUBLIC of TEA, ensuring that flavor, color and quality expectations are met.

WHAT IS THE CAFFEINE CONTENT OF YOUR TEA?

Black tea has significantly less caffeine than a cup of coffee (with the exception of our HiCAF® Teas, which have the same amount of caffeine or more than coffee). Our herbal blends are naturally caffeine free unless otherwise noted.

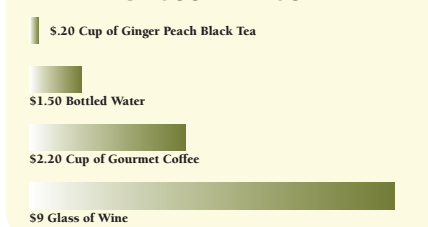

CAFFEINE CONTENT
milligrams per 6 ounce cup

HOW DOES THE PRICE OF YOUR TEA COMPARE TO OTHER BEVERAGES?

Our premium tea is an affordable luxury, costing an average of \$0.27 per cup. All of our tea tins contain enough tea for 36 to 60 servings, depending on the variety.
