Apparel Recycling

BRINGING CIRCULARITY TO YOUR CAMPUS

Our 360° Closed Loop Program is an apparel recycling program where we collect, break down, and reuse old or unused shirts to keep textile waste out of landfills. This program offers an innovative, eco-friendly solution that engages consumers, reduces pollution, and minimizes waste.

INTERESTED IN HAVING OUR

STOCKED STYLES

BLANK APPAREL + ACCESSORIES

PROUD TO OUTFIT COLLEGES AND UNIVERSITIES SMALL TO BIG

An opportunity for colleges and universities to help close the loop on apparel waste and be part of the solution while creating profitable revenue.

We offer custom orders with a minimum of **48 units** with **3 week** lead time to ship upon approval.

HOW TO GET STARTED:

- ❶ Select your products.
- ❷ Send us your artwork to be printed or embellished on the garment.
- ❸ We send you a digital proof for approval.
- ❹ Email our marketing team with your logos so we can create POS material.
- ❺ Once approved, your order prints and ships in 3 weeks.

RESPONSIBLY BRANDED APPAREL CUSTOMIZATION

Screenprinting

Screen printing involves creating a stencil on a mesh screen, and then pressing ink through the mesh to transfer the design onto the fabric. With our wide variety of specialty inks, we can customize any high-quality print. Screen printing works best for simple designs without fine details.

Embroidery

Embroidery uses various stitching patterns and thread colors to produce images, logos, or text, resulting in durable and high-quality embellishment. Popular for its professional appearance and long-lasting finish, it is frequently used in customizing uniforms, promotional items, and fashion garments.

Direct-To-Garment (DTG)

DTG uses a specialized printer that allows an image to be printed directly onto a garment. Since this is a digital process, the print is sharper and has a higher resolution than traditional printing methods. We utilize eco-friendly water-based inks with no color limitations. DTG works for digital images or designs with many colors and details.

Sublimation

Sublimation printing uses heat to bind the fabric and ink together. This method permanently embeds the ink into the fabric for fade and crack-resistant designs without affecting the hand feel. Sublimation is often used for “all-over printing,” as it is capable of printing designs from seam to seam. This printing method has the ability to print any pattern or Pantone color.

Heat Transfer

With heat transfer, also known as digital transfer, your custom logo or design is printed onto transfer vinyl. Then, the ink is thermally transferred from the vinyl to your fabric. This method is popular for everyday decoration and larger graphics.

Custom Knit Design

Custom knit design allows for a design to be knitted into the fabric utilizing various yarn colors. This is a fully customizable option, allowing for designs across the entire product. This customization is only available for our sock styles.
